PROFILE

B.Sc. (Tech.) in IT pursuing a Master's degree in Human-Technology Interaction and Information Analytics. Interested in the intersection of technology, business, and user needs, with experience in software development, UX design, and collaborative project work. Motivated to contribute to digital products and services through practical problem-solving, data-informed thinking, and a strong curiosity for AI and emerging technologies.

EDUCATION

Tampere University <i>Master of Science (Technology), Information Technology</i> - Major: Human-Technology Interaction - Minor: Information Analytics	Tampere, Finland 2026 – Present (Expected 2028)
Tampere University <i>Bachelor of Science (Technology), Information Technology</i> - Major: Software Engineering - Minor: Human-Technology Interaction	Tampere, Finland 2026
Helsinki Upper Secondary School of Natural Sciences <i>Finnish Matriculation Examination (Ylioppilas)</i>	Helsinki, Finland 2018

ACADEMIC PROJECTS

Metrics Monitoring Tool <i>PHP, Javascript, HTML, MariaDB, Docker, Figma</i>	Jan. 2025 – May. 2025
- Acted as a bridge between client, product, and development: gathered requirements from stakeholder interviews, translated them into UI specifications, and collaborated with developers through code reviews and sprint ceremonies. - Designed dashboard views including KPI cards, progress indicators, calendar/event views, and meeting participation features, balancing client needs with technical feasibility. - Worked in a full Agile workflow (GitLab, sprints, Kanban, code reviews) with developers, product roles, and client representatives across the full project lifecycle.	
budgIT <i>Figma, UX research, Wireframing, Prototyping</i> <u>Case Study</u>	Jan. 2024 – March. 2024
- Owned the end-to-end design process: scoped the research, conducted and analyzed 4 user interviews, defined personas and user scenarios, and set feature priorities across 5 core areas. - Led the interactive Figma prototype through two structured iterations, connecting user research findings directly to UI decisions; peer review praised ease of use and visual quality. - Drove design decisions in team discussions, communicated rationale clearly to teammates, and iterated based on structured feedback to improve hierarchy and readability.	

EXPERIENCE

Data Center Specialist <i>Iron Mountain</i>	Jun. 2022 – Jul. 2022 Helsinki, FI
- Processed and validated large volumes of archival data, ensuring data accuracy and integrity in secure environments. - Maintained structured documentation and operational records - Followed strict data management procedures and quality protocols when working with sensitive information.	
Car Courier <i>Mailia</i>	Nov. 2019 – Jan. 2020 Helsinki, FI
- Managed delivery routes independently and reliably - Adapted quickly to changing schedules and operational situations - Maintained punctual and accurate service execution	

SKILLS

Methods & Collaboration: Agile, Scrum, Kanban, sprint planning, requirement gathering, stakeholder collaboration, design-development handoff, data-informed design, code reviews

Design & Research: Figma, wireframing, prototyping, interaction design, user interviews, usability testing, personas, user journeys, accessibility-aware design

Development: HTML, CSS, JavaScript, React, PHP (CakePHP), Python, C++, Git, GitLab, REST APIs
